Identification of the Area

Name or Designation: Area 32: North Downtown Seattle

Boundaries:

Area 32, or North Downtown Seattle, as identified by the King County Department of Assessments lies immediately north and west of the Seattle's Central Business District, south of Queen Anne Hill, and east of Capital Hill. It includes the Downtown Elliot Bay waterfront, Belltown, Lower Queen Anne and the Seattle Center, and South Lake Union. Belltown and Lower Queen Anne are dynamic, urban neighborhoods with a mix of commercial and residential uses. South Lake Union is a neighborhood in transition from an underutilized commercial/warehouse/residential district to a neighborhood of new offices, biotechnical labs, retail and multi-family housing.

The boundary of Area 32 on the north is West Olympic Place, West Aloha Street and East Galer Street. The southern border is along Lenora Street to 5th Avenue and along Denny Way and South Washington Street. The west boundary is the Elliott waterfront and the east boundary is Interstate 5 in the north portion, and 5th Avenue in the Belltown neighborhood.

Maps:

A general map of the area is included in this report. More detailed Assessor's maps are located on the 7th floor of the King County Administration Building.

Area Description:

Area 32, known as North Downtown Seattle, is divided into four neighborhoods. They are generally similar in their mixed-use zones. Commercial, community and regional service enterprises, and multifamily land uses predominate. They are typically distinguished by their respective arterial linkages south into Downtown proper, and north into the predominantly residential parts of Seattle beyond the Lake Washington Ship Canal. A brief description of the four neighborhoods follows.

Belltown: Area 32-10

Boundaries: Belltown is bounded on the north by Denny Way, on the south by Lenora Street and the Pike Place Market, on the west by Elliott Avenue, and on the east by Fifth Avenue.

Neighborhood Description: This area is primarily zoned Downtown Mixed Residential (DMR) with Downtown Mixed Commercial (DMC) zoned parcels located in the north boundary. Belltown, a major part of Seattle's fastest growing neighborhood (Denny Regrade), is once again seeing new mixed-use development. Historically Belltown was a neighborhood of apartments and rooming houses, union halls, and marginal businesses, in proximity to the city center. In the mid-1970's the city approved new zoning to encourage construction of a mid to high-rise residential district. In the late 1980's and 1990's as the regional economy grew, development in Belltown accelerated. Condominiums, apartment buildings, retail and restaurants, and mid-rise office buildings were built. The proximity to Pike Place Market, the waterfront, Seattle Center, and the downtown business district plus the traffic congestion in the greater metropolitan area makes Belltown an attractive, twenty four hour, in-city neighborhood.

The Comprehensive Plan estimates that an additional 6,500 households will be constructed in Belltown by the year 2014. This area is primarily targeted to increase residential units' occupancies in the neighborhood by encouraging investors and developers to construct apartments and/or condominiums. The zone classifications for Belltown (Area 32-10) are Downtown Mixed Residential (DMR), designated as either Downtown Mixed Residential/Residential (DMR/R) or Downtown Mixed Residential/Commercial (DMR/C). These designations have a building height limit that ranges from 65 feet to 240 feet. The northern portion of the neighborhood along Denny Way has the zone classification of Downtown Mixed Commercial with a building height limit of 65 to 240 feet.

South Lake Union: Area 32-20

Boundaries: This area is located east of 6th Avenue North, south of Galer Street and Lake Union, west of I-5, and north of Denny Way.

Neighborhood Description: South Lake Union is a neighborhood in transition. Historically called the Cascade Neighborhood, residential use has declined since the 1950's when zoning changes limited new residential uses and promoted light manufacturing uses. Construction of I-5 in the 1960's cut off the neighborhood from the west portion of Capital Hill. In the late 1980's the in-close location and the less expensive land values started to get the attention of several biotech and high tech companies. Fred Hutchinson Cancer Research Center, and later Zymogenetics located in the northeast sector of the neighborhood, while in the southeast sector REI relocated their flagship store in 1995. In the mid 1990's the concept of the 74 acre "Seattle Commons" park was twice defeated. Subsequently, the City of Seattle and developers, including the Vulcan NW Group that has accumulated 60 acres, have put in place development plans that may transform the South Lake Union neighborhood into a new commercial/residential neighborhood with a focus on biotech and biomedical research. City projections include 15,000,000 square feet of development (half commercial and half residential) by 2020, and up to 39,000 new jobs by 2025. The city has already approved raising building height limitations in several zoning areas to accommodate biotech buildings and support higher residential density. Other infrastructure improvements will include a new substation, a waterfront park, a revamped Mercer Street, and a street car service.

Lower Queen Anne Hill: Area 32-30

Boundaries: This area is located east of the Puget Sound waterfront, south of West Olympic Place and West Aloha Street, west of 6th Avenue North, and north of Denny Way.

Neighborhood Description: This area consists of mixed-use properties, predominately multifamily apartments and condominiums, and mid and low-rise office buildings. The area also is in demand for small-office, owner-occupant properties by those who want to be in a close-in, urban pedestrian neighborhood. The major landholder is the City of Seattle with the Seattle Center which includes Key Arena, Pacific Science Center, Memorial Stadium, Opera House, Pacific Science Center, the Space Needle and Experience Music Project Museum. There are many retail businesses, hotels, restaurants, and related parking structures adjacent to Seattle Center. The purchase and planned campus development of twelve acres of city land adjacent the Seattle Center for the Gates Foundation headquarters is expected to spur additional mixed use development in the eastern portion of the Lower Queen Anne neighborhood.

Downtown Harborfront: Area 32-40

Boundaries: This neighborhood comprises the upland parcels along Seattle Elliott Bay Pier Waterfront and Alaskan Way, from South Washington Street at the southwestern boundary to Broad Street at the northwestern boundary. The Alaska Way Viaduct physically separates this waterfront area from Belltown, the CBD, and Pioneer Square to the east.

Neighborhood Description: The Downtown Harborfront neighborhood, known as the Central Waterfront, is located across from the downtown pier area. The area's improved parcels include retail and restaurants, hotels, office buildings, parking garages, mixed-use multifamily dwellings, storage warehouse, and office warehouse use. The Washington State Ferry Terminal at the Colman Dock, the Seattle Aquarium, the Port of Seattle Marina and Cruise Ship Terminal, the Edgewater Inn, and the Victoria Clipper terminal are well known landmarks. In recent years there has been considerable development of residential condominiums and a new Marriot hotel in the north sector of this area, on the east side of Alaskan Way. In the future Area 32-40 will be impacted by the configuration and reconstruction of the Alaskan Way Viaduct and the adjacent seawall.

The zone classifications are Downtown Harborfront-1 (DH-1) and Downtown Harborfront-2 (DH-2).

Downtown Harborfront-1 (DH-1) zone applies to waterfront lots and adjacent harbor areas where economically viable marine uses are encouraged to meet the needs of waterborne commerce, facilitate the revitalization of downtown's waterfront, provide opportunities for public access and recreational enjoyment of the shoreline, preserve and enhance elements of historic and cultural significance, and preserve views of Elliott Bay and the land forms beyond. To preserve and restore the historic maritime character of Piers 54 through 59 (but excluding the new Aquarium structure); development standards are augmented by Historic Character Area guidelines. Water dependent uses are encouraged through development standards that allow greater development potential and design flexibility than permitted by the base regulations.

Downtown Harborfront-2 (DH-2) zone applies to those areas near the downtown shoreline where development potential offers the opportunity to enhance public access and enjoyment of the waterfront. Because the areas designated DH-2 are partially within a shoreline environment, development standards include use and bulk regulations to carry out shorelines goals, and preserve views of the water. A diversity of uses and buildings of small scale are preferred. Incentives are offered for the provision of public open space integrated with an overall plan for public access improvements.

The general provision of these two zone classifications is that all uses shall meet the development standards of the Seattle Shoreline Master Program, and development rights may not be transferred to or from lots in DH-1 or DH-2 zones. The zone designation for this neighborhood

is intended to provide commercial activities in support of shoreline goals and related office, commercial, retail and residential uses. This area is intended to provide a transition in scale and character between the waterfront and adjacent downtown areas.

Physical Inspection Identification:

Neighborhood Area 32-30 (Lower Queen Anne) was physically inspected for the 2006 assessment year.

Preliminary Ratio Analysis

A Ratio Study was completed just prior to the application of the 2006 recommended values. This study benchmarks the current assessment level using 2005 posted values. The study was also repeated after application of the 2006 recommended values. The results are included in the validation section of this report, showing improvement in the Coefficient of Variation (COV) from 16.35% to 9.05%, Coefficient of Dispersion (COD) from 10.10% to 6.84%. The weighted mean ratio which is a statistical measure of assessment level went from 90.3% to 97.7%. The Price-related Differential (PRD) went remained constant at 1.01%.

Scope of Data

Land Value Data:

Vacant sales that closed between 1/29/2001 to 1/09/2006 were given primary consideration for valuing the land parcels in Area 32. Vacant sales that occurred in 2001 were included in this year's valuation because there have been limited land sales in Area 32-30 (Belltown) until recently.

The primary unit of comparison considered was based on price per square foot of land area. "Shell" sales, interim use sales, tear down sales, and land transactions that included plans and permits were considered in the analysis of the land values. The comparative sales approach generally is considered the most reliable method for land valuation. Zoning and location were the primary variables considered in the valuation process.

Improved Parcel Total Value Data:

Improved sales that closed from 1/06/2003 to 11/01/2005 were given the greatest consideration for establishing total value estimates. Sales information is obtained from excise tax affidavits and reviewed initially by the Accounting Division, Sales Identification Section. Information is analyzed and investigated by the appraiser in the process of revaluation. All sales were verified, if possible, by contacting either the purchaser or seller, inquiring in the field or contacting the real estate broker. Characteristic data is verified for all sales when possible. Due to time constraints, interior inspections were limited. Sales are listed in the "Sales Used" and "Sales Not Used" sections of this report. Additional information resides in the Assessor's procedure manual located in the Public Information area of the King County Administration Building.

Land Value

Land Sales, Analysis, Conclusions

There were 48 sales considered in Area 32 which include sub-areas 32-10, 32-20, 32-30, and 32-40. These neighborhoods are typically distinguished by their predominant zone classification. In analyzing the sales in Area 32, neighborhood, location within the neighborhood, zoning and height limit availabilities, and utility of the site were also considered. In Lower Queen Anne (Area 32-30) views were considered for land parcels with L-3 and MR zoning. When recent sales were unavailable such as in sub-area 32-40 the Downtown Waterfront, sales from other neighborhoods were considered.

Belltown: Area 32-10

A review of existing and new land sales, indicate that an increase in land value for most zoning designations is appropriate. The range of value for many of the DMR zone designations reflects adjustments for the location and or utility of the individual parcels. The table below represents the 2006 estimated land value per square foot for each zone in the Belltown Area.

| 32-10 | Belltown | DMC 85 | \$145 to \$155 |
|-------|--------------------------------|---------------|----------------|
| 32-10 | Belltown | DMR/R 85/65 | \$150 to \$155 |
| 32-10 | Belltown | DMR/C 85/65 | \$155 to \$160 |
| 32-10 | Belltown | DMR/C 125/65 | \$160 to \$170 |
| 32-10 | Belltown | DMC 240 | \$185 |
| 32-10 | Belltown | DMC 65 | \$140 to \$150 |
| 32-10 | Belltown | DMR/C 240/125 | \$165 to \$175 |
| 32-10 | Belltown | DMR/R 125/65 | \$150 to \$165 |
| 32-10 | Belltown – Seattle Puget Sound | DH1-45 | \$35 |
| | Pier Waterfront | | |
| 32-10 | Belltown – Seattle Puget Sound | IC-45 | \$35 |
| | Pier Waterfront | | |

South Lake Union: Area 32-20

Land sales in this neighborhood support an increase in value for land parcels in most zone designations and areas within the neighborhood where development is occurring or is planned. The table below represents the 2006 estimated land value per square foot for each zone in the South Lake Union Area. Parcels with waterfront on Lake Union were removed from the geographical appraiser's responsibility and are valued by the waterfront specialist. These parcels are coded in Area 12.

| 32-20 | South Lake Union | NC3-40' | \$95 to \$95 |
|-------|------------------|-------------|----------------|
| 32-20 | South Lake Union | NC3-65' | \$105 to \$120 |
| 32-20 | South Lake Union | NC3-85' | \$115 to \$125 |
| 32-20 | South Lake Union | NC3-125' | \$120 |
| 32-20 | South Lake Union | SM- 40' | \$90 |
| 32-20 | South Lake Union | SM-65' | \$90 to \$120 |
| 32-20 | South Lake Union | SM/R-55/75' | \$110 |
| 32-20 | South Lake Union | SM-85' | \$115 to \$120 |
| 32-20 | South Lake Union | SM-125' | \$105 to \$125 |
| 32-20 | South Lake Union | C1-65' | \$90 to \$95 |
| 32-20 | South Lake Union | C2-40' | \$100 |
| 32-20 | South Lake Union | C2-65' | \$105 to \$110 |
| 32-20 | South Lake Union | C2-85' | \$115 |
| 32-20 | South Lake Union | IC-45' | \$90 |
| 32-20 | South Lake Union | IC-65' | \$110 to \$120 |
| 32-20 | South Lake Union | IC-85' | \$115 |

The range of values for certain zone designations reflects location, size, access, and utility. The land values of a few parcels along the east side of Aurora Avenue were adjusted for topography.

Lower Queen Anne Hill: Area 32-30

New and existing land sales in this neighborhood support increases in land value of land parcels in most zoning designations. The table below represents the 2006 estimated land value per square foot for each zone in the Lower Queen Anne Hill Area.

| 32-30 | Lower Queen Anne | MR | \$95 to \$125 |
|-------|------------------|-----------|----------------|
| 32-30 | Lower Queen Anne | L-3 RC | \$75 |
| 32-30 | Lower Queen Anne | L-3 | \$75 to \$125 |
| 32-30 | Lower Queen Anne | NC2-40' | \$100 |
| 32-30 | Lower Queen Anne | NC3-40' | \$95 to \$105 |
| 32-30 | Lower Queen Anne | NC3-40/P1 | \$105 |
| 32-30 | Lower Queen Anne | NC3-65' | \$115 to \$120 |
| 32-30 | Lower Queen Anne | NC3-85' | \$115 to \$120 |
| 32-30 | Lower Queen Anne | SM-85' | \$115 to \$130 |
| 32-30 | Lower Queen Anne | C2-40' | \$60 to \$95 |
| 32-30 | Lower Queen Anne | IC-45' | \$40 to \$70 |
| 32-30 | Lower Queen Anne | IC1 U-45 | \$40 |

The range of values for certain zone designations reflects location, size, utility, and topography of individual parcels within the sub-area. SM-85 designated parcels, and MR and L-3 parcels with good to excellent views represent the upper range of value.

Downtown Harborfront: Areas 32-40

Due to the lack of land sales in this neighborhood, land sales in Areas 32-10, 32-30, 30-60, 30-80, and 30-100 were considered to estimate the land value. The table below indicates the 2006 estimated land per square foot for each zone.

| 32-40 | Downtown Harborfront | DH2-65 | \$150 |
|-------|--------------------------|--------|----------------|
| 32-40 | Downtown Harborfront | DH2-85 | \$135 to \$160 |
| 32-40 | Downtown Harborfront | DH2-55 | \$120 - \$140 |
| 32-40 | Downtown Harborfront - | DH1-45 | \$35 |
| | Seattle Puget Sound Pier | | |
| | Waterfront (Tidelands) | | |

The total assessed land value in Area 32, for the 2005 assessment year was \$1,986,227,069 and the 2006 total recommended assessed land value is \$2,149,266,500. Application of these recommended values for the 2006 assessment year (taxes payable in 2007) results in an increase of 8.21 %. This increase is primarily due to upward market changes in Belltown (32-10) South Lake Union market area (32-20) and Lower Queen Anne (32-30).

A list of vacant sales used and those considered not reflective of market are included in the following sections.

Improved Parcel Total Values:

Sales Comparison Approach model description

The model for sales comparison was based on characteristics from the Assessor's records including location, effective age, building quality and net rentable area. Sales with characteristics most similar to the subject properties were considered.

The improved sales used range in date from 1/06/2003 to 11/01/2005. There were 37 improved sales in Area 32 that were considered as fair market transactions reflective of the market conditions. These sales were organized into market segments based on predominant use. The sale price ranges serve to establish a general upper and lower market boundary for the various property types within the subject area and were useful when analyzing the income parameters and capitalization rates used in the income models for the various neighborhoods. Location, quality, and effective age were factors considered for adjustment. Stratification of these sales shows the following market ranges:

1) Offices (25,000 SF rentable or larger): \$109 to \$283 per sq. ft.

Offices (under 25,000 SF rentable): \$115 to \$271 per sq. ft.
Retail \$173 to \$272 per sq. ft.
Warehouse/Light Industrial \$50 to \$156 per sq. ft.
Commercial Condominium Units \$176 to \$455 per sq. ft.

Cost Approach model description

Cost estimates are automatically calculated via the Marshall & Swift Valuation modeling system. Depreciation was based on studies done by Marshall & Swift Valuation Service. The cost was adjusted to the western region and the Seattle area. Cost estimates were relied upon for valuing special use properties where comparable sales data and/or income/expense information is not available. These properties are typically exempt properties such as churches, schools, public utility buildings, and park improvements. Non-exempt buildings that are valued by the Cost method might be fraternal halls, daycares, and on-going new construction.

Cost calibration

The Marshall & Swift Valuation modeling system which is built in the Real Property Application is calibrated to the region and the Seattle area.

Income Capitalization Approach model description

The Income Approach was considered a reliable approach to valuation throughout Area 32 for improved property types where income and expense data is available to ascertain market rates. Income parameters were derived from the market place through market rental surveys, sales, and available real estates publications and websites.

The following tables are the results of an analysis of this information. The tables stratify the major property types for each area and the income parameters used.

Belltown: Area 32-10 &

Downtown Harbor: Area 32-40

| Property Type | Rent/SF Range | Vacancy Rate | Expense Rate | OAR |
|---|---------------|-----------------|-----------------|--------------|
| Office | \$14 to \$30 | 10 to 12% | 35% | 7% to 9% |
| Open Office | \$12 to \$25 | 10% to 12% | 35% | 8% to 9.5% |
| Loft Basement Office & Mezzaninies Office | \$10 to \$20 | 10% to 15% | 35% | 8% to 10% |
| Retail, Restaurant | \$14 to \$25 | 5% to 15% | 10% to 20% | 7% to 9.5% |
| Basement Finished, Mezz, Balcony | \$4 to \$13 | 10% to 15% | 15% to 25% | 8.5% to 10% |
| Discount Store, Supermarket, Dept Store | \$10 to \$20 | 5% to 15% | 10% to 20% | 7% to 9% |
| Storage Warehouse & Light Manufacturing | \$5 to \$16 | 5% to 15% | 10% to 20% | 7.5% to 10% |
| Line Retail | \$18 to \$30 | 5% to 10% | 5% to 10% | 7% to 8.5% |
| Service Garage Repair | \$11 to \$19 | 10% to 15% | 15% to 25% | 8.75% to 10% |

South Lake Union: Area 32-20

| Property Type | Rent/SF Range | Vacancy Rate | Expense Rate | OAR |
|-----------------|---------------|-----------------|-----------------|--------------|
| Office | \$14 to \$30 | 10% | 35% | 7% to 9% |
| Open Office | \$12 to \$25 | 10% to 15% | 35% | 8% to 9.50% |

| Repair | \$11 to \$19 | 10% to 15% | 13% 10 23% | 0.73% tO 10% |

Lower Queen Anne Hill: Area 32-30

| Property Type | Rent/SF Range | Vacancy Rate | Expense Rate | OAR |
|---|---------------|-----------------|-----------------|--------------|
| Office | \$14 to \$30 | 10% to 12% | 35% | 7% to 9% |
| Open Office | \$12 to \$25 | 10% to 12% | 35% | 8% to 10% |
| Loft Bsmt. Office & | \$10 to \$20 | 10% to 12% | 35% | 8% to 10% |
| Mezz. Office | | | | |
| Retail, Restaurant | \$14 to \$25 | 5% to 15% | 10% to 20% | 7% to 9.5% |
| Line Retail | \$18 to \$30 | 5% to 10% | 5% to 10% | 7% to 8.5% |
| Basement Finished, Mezz, Balcony | \$6 to \$13 | 10% to 15% | 15% to 25% | 8.5% to 10 % |
| Discount Store, Supermarket, Dept Store | \$10 to \$20 | 5% to 15% | 10% to 20% | 8% to 9% |
| Warehouse Storage & Light Manufacturing | \$5 to \$16 | 10% to 25% | 10% to 20% | 7.5% to 10% |
| Service Garage Repair | \$11 to \$19 | 10% to 15% | 15% to 25% | 8.75% to 10% |

Stratification adjustments for the parameters listed were based on quality of construction, effective age, size, and location.

On properties where income from parking was valued, a separate income approach was utilized. This income approach was developed through sales, market surveys, and available publications including the publication of the 2004 Parking Inventory for the Central Puget Sound Region, prepared by the Puget Sound Regional Council. The monthly rate ranged from \$47 to \$170/stall depending on the location. The occupancy range was 51% to 62% and the annual expense rate range applied was 10% to 25%. Stratification adjustments made were based on condition, quality of construction, effective age, and location.

Income approach calibration

The models were calibrated after setting base rents by using adjustments on size, quality of construction, and the effective age. When the value of the property by the income approach was less than the land value, a minimal \$1,000 value was allocated to the improvements. For properties where sales and income/expense data was not available, the Cost Approach was utilized.

Reconciliation and/or validation study of calibrated value models including ratio study of hold out samples.

All parcels were individually reviewed for correctness of the model application before final value selection. All of the factors used to establish value by the model were subject to adjustment. The market sales approach is considered the most reliable indicator of value when comparable sales were available, however the income approach was applied to most parcels in order to better equalize comparable properties. Whenever possible, market rents, expenses, and cap rates were ascertained from sales, and along with data from surveys and publications these parameters were applied to the income model.

The income approach to value was considered to be a reliable indicator of value in most instances. The market rental rate applied to a few properties varied from the model but fell within an acceptable range of variation from the established guideline.

Model Validation

Total Value Conclusions, Recommendations and Validation:

Appraiser judgment prevails in all decisions regarding individual parcel valuation. Each parcel in the physical inspection neighborhood was field reviewed and a value selected based on general and specific data pertaining to the parcel, the neighborhood, and the market. The appraiser determines which available value estimate may be appropriate and may adjust for particular characteristics and conditions as they occur in the valuation area.

The standard statistical measures of valuation performance are presented both in the Executive Summary and the 2005 and 2006 Ratio Analysis charts included in this report. Comparison of the 2005 Ratio Study Analysis with the 2006 Ratio Study Analysis indicates that the weighted mean statistical measure of assessment level went from 90.3% to 99.7%. The Coefficient of Dispersion (COD) went from 10.10% to 6.84%, the Coefficient of Variation (COV) went from 16.35% to 9.05%, and the Price-related Differential (PRD) remained constant at 1.01. This is within the IAAO appraisal guidelines for measures of valuation uniformity and equity.

The total assessed values for Area 32 for the 2005 assessment year was \$3,275,016,543 and the total recommended value for the 2006 assessment year is \$3,532,917,480 (does not include specialty properties but does include mixed use condos). Application of these recommended values for the 2006 assessment year (taxes payable in 2007) results in an average total change from the 2005 assessments of 7.87 %.

Note: More details and information regarding aspects of the valuations and the report are retained in the working files and folios kept in the office.
